## Executive Summary

RBC Dominion valeurs mobilières Inc.

Vincent Bonnet

# LinkedIn AI Agent

The LinkedIn AI Agent is a standalone desktop application designed to automate and optimize LinkedIn-related tasks for users. By leveraging AI and NLP technologies, the software aims to enhance LinkedIn interactions, streamline contact management, and improve outreach efforts. The application will be distributed as a .exe file for Windows and will store all data locally, ensuring user privacy and control.

## Proposal

ID:

2024-015  
Background

In today's professional world, LinkedIn has become an essential platform for networking and outreach. However, managing contacts, generating personalized messages, and keeping track of conversations can be time-consuming and challenging. The LinkedIn AI Agent addresses these issues by automating various LinkedIn tasks, using AI to provide intelligent insights and personalized interactions. This software will significantly reduce manual effort, enhance productivity, and improve the effectiveness of LinkedIn outreach activities.

Date: 2024-05-24

RBC Dominion valeurs mobilières Inc.

---

# LinkedIn

Automate the scraping and storage of first-level LinkedIn contacts.

# AI Agent

Create and manage ignore lists using NLP to filter out irrelevant contacts.

Store and manage conversation history with LinkedIn contacts.

Enable users to create and manage targeted campaigns.

Generate personalized initial and follow-up messages using AI.

## Proposal

Provide a user-friendly interface for message approval and contact management.

ID:

~~\$2024015~~ 5148408830 follow-up messages and track pending invitations.

Allow users to input and manage settings such as OpenAI API key and Chrome browser path.

## Scope

---

The LinkedIn AI Agent will be a standalone desktop application for Windows, designed to automate LinkedIn tasks and enhance user interactions. The software will include functionalities for scraping contacts, managing ignore lists, storing conversation history, creating campaigns, generating personalized messages, and automating follow-ups. Data will be stored locally in JSON files, and users will be responsible for backing up their data. The application will feature a modern user interface built with Tkinter and will integrate with OpenAI for NLP tasks.

## Deliverables

---

A standalone .exe application for Windows.

File:  Shape and store first-level LinkedIn contacts in Contacts.json.  
Date: 2024-05-24

File:  List creation and management.

RBC Dominion valeurs mobilières Inc.

Storage of conversation history in MessageHistory.json.

Vincent Bonnet

LinkedIn

Campaign creation and management UI with filtering options.

1501 avenue McGill College, bureau 2150, Montréal, QC

Personalized message generation using OpenAI.

AI Agent

Message approval interface for reviewing and approving generated messages.

vincent.bonnet@rbc.com

Automated follow-up message sending and tracking of pending invitations.

5148408830

Settings section for managing message sending limits, invitation limits, follow-up  
message limits, OpenAI API key, and Chrome browser path.

Proposal

ID:

## **LinkedIn and Storage**

Vincent Bonnet

1501 avenue McGill College, bureau 2150, Montréal, QC

Functionality to scrape and store first-level LinkedIn contacts in `Contacts.json`.

NLP-based ignore list creation and management.

Storage of conversation history in `MessageHistory.json`.

## **Proposal Campaign Management and Personalized Messaging**

ID:

**S2024015** Campaign creation and management UI with filtering options.

Personalized message generation using OpenAI.

Message approval interface for reviewing and approving generated messages.

## **Automated Follow-Up and Outreach**

Automated follow-up message sending and tracking of pending invitations.

Settings section for managing message sending limits, invitation limits, follow-up message limits, OpenAI API key, and Chrome browser path.

## **Final Product Delivery and Documentation**

A standalone .exe application for Windows.

User documentation and instructions for setting up and using the application.

Date: 2024-05-24

RBC Dominion valeurs mobilières Inc.

## LinkedIn Data Sync to Local Storage

Vincent Bonnet

1501 avenue McGill College, bureau 2150, Montréal, QC

Encourage users to regularly back up their data using external storage solutions such as Google Drive or external hard drives.

#343me

vincent.bonnet@rbc.com

Provide clear documentation and reminders within the application to prompt users to perform regular backups.

5148408830

### Proposal

Implement a feature that allows users to easily export their data to a backup location.

**S2024015**

## Dependency on External Services (OpenAI API and Chrome Browser)

Ensure comprehensive error handling and fallback mechanisms are in place if the OpenAI API or Chrome browser is unavailable.

Provide clear instructions for users on how to set up and troubleshoot their OpenAI API key and Chrome browser path.

Regularly update the application to maintain compatibility with the latest versions of the OpenAI API and Chrome browser.

## Performance Issues with Large Data Sets

Optimize data handling and storage processes to ensure efficient performance even with large contact lists and message histories.

Implement pagination and lazy loading techniques in the UI to manage large data sets without impacting performance.

Conduct thorough performance testing to identify and address potential bottlenecks before release.

## AI Agent

Myte Group specialize in crafting custom AI automation solutions that streamline workflows and enhance operational efficiency for businesses across various industries. Our expertise lies in developing AI-powered websites and digital work environments tailored to the unique needs of our clients. By integrating artificial intelligence into core business processes, we deliver systems that not only reduce manual effort but also significantly increase accuracy and decision-making speed. Our commitment to innovation and excellence empowers businesses to achieve sustainable growth and maintain a competitive edge in their respective markets.

## Relevant Experience

Myte Group has extensively optimized various internal operations through customized AI-driven solutions, particularly in sales, marketing, outreach, estimation, planning, and research. This expertise reflects our ability to enhance process efficiencies and accuracy, thereby improving time management and resource allocation across departments. Our strategic implementations of AI have significantly streamlined these key business functions, demonstrating our capability to elevate organizational performance and drive substantial growth through innovation in AI technology.

## Team Expertise

Under the leadership of Ahmed Mekallach, Myte Group boasts a profound expertise uniquely blending business acumen with technical prowess. With over eight years of experience in sales, estimating, and project management, Ahmed's comprehensive understanding of business processes and keen coding skills enable him to tackle challenges efficiently and innovatively. His approach not only ensures operational excellence but also drives the development of AI-driven
